

A DESIGN WE LIKE!

Those who attended the Architectural Workshop on 11th August were unanimous in their enthusiastic approval of our architect's latest design concepts. The architect really has taken our feedback and concerns on board and will now proceed to work up these concepts into an outline proposal.

Further information, drawings and an animation will shortly appear on colliestononline.org. You can also view this material on computers that several people have agreed to make available, so that everyone has another chance to see the proposed design concept for the hall.

The architect will then present the outline proposal at a short public meeting in mid September prior to applying for outline planning permission.

Look out for further information.
