Funding emergency work on pier

Debra Storr said the present harbour trustees required that the money held in accounts operated by the previous trustees be transferred to the Community Council. Trish to speak to Ken Ingram to request that he arrange for two signatories (former trustees) to release funding held in the Harbour Trustees account to the Community Council.

Huib Attema as treasurer for the Community Council produced an invoice for £26,259 for the recent work done to pier.

Monies still to be consolidated into one account. Huib needs to know how much money is available in the various accounts to consolidate into one Community Council account.

The recent work done on the pier was remedial in nature and the group decided that it was difficult to evaluate the quality of the work done for the money spent as most of the work was done below the waterline.

The work done on the steps from Norman's hut down onto the beach seemed satisfactory to the group. Some concern was expressed about some of the work done to the side of one of the ladders

AOCB

Andrew is still negotiating with Scottish Water over the Signage for the pier

Date of Next Meeting

3 December 2009 730pm Collieston Community Centre
